

Tasks week2

Task 1. Write a Python program to get a list, sorted in increasing order by the last element in each tuple from a given list of non-empty tuples.

Sample List : [(2, 5), (1, 2), (4, 4), (2, 3), (2, 1)]

Expected Result : [(2, 1), (1, 2), (2, 3), (4, 4), (2, 5)]

Task 2. Given a string s1, write a program to return the sum and average of the digits that appear in the string, ignoring all other characters.

Task 3. Write a Python program to sort a list of dictionaries using Lambda.

Original list of dictionaries : [{'make': ' Google ', 'model': 216, 'color': 'Black'}, {'make': 'Mi Max', 'model': '2', 'color': 'Gold'}, {'make': 'Samsung', 'model': 7, 'color': 'Blue'}]

Sorting the List of dictionaries : [{'make': ' Google ', 'model': 216, 'color': 'Black'}, {'make': 'Samsung', 'model': 7, 'color': 'Blue'}, {'make': 'Mi Max', 'model': '2', 'color': 'Gold'}]

Task 4. Write a Python program to convert a given list of strings into list of lists using map function.

Task 5. Create a dictionary with the events in Dortmund and the date of the event. List all events that were running during the Night of Museums in Dortmund on 19th September 2026.
